Good bread—why not? You've been used to eating bread made the hard way. It has been pretty good bread—but not the best bread. The really best bread is made with Crusto.

Not a substitute for lard but better than lard. In the first place it is flavorless, tasteless and odorless—it is pure and sweet. It acts as the binder, enricher and shortener that you've used lard for—but it does it all better. We can't describe it further. Try it and taste the description.
